Adobe Photoshop

Web Developer specializing in front end development. Thorough hands-on experience with all stages of the development cycle for web projects. Well-versed in programming languages including JavaScript, React Native and PostgreSQL. Strong background in agile development and adobe photoshop. Seeking to gain more experience and further developing my skills.

Projects

2017-05 — **Theeden Gardens**
Web Application
- Co-developed a functional food ordering system (Kiosk style). This system consisted of the Admin Page, Order Page, and the Kitchen Page.
- Developed a user-friendly interface for the admin page which includes opening and closing store, adding, removing and updating menu items and users.
- Edited the menu images that were used in the order page.
- Managed our team repository.
- Technologies Used: *HTML5 , JavaScript, CSS, Bootstrap, PostgreSQL, Heroku, GitHub, & Adobe Photoshop*

2017-11 — **Cryptocurrency Portfolio**
Mobile Application
- Co-developed a mobile application to help users keep track of their cryptocurrency portfolio. This includes a dashboard and a twitter news feed to show the latest cryptocurrency related news.
- Implemented the shake event which refreshes the twitter news feed.
- Designed the interface for the entire application and created the its splash screen and icon.
- Technologies Used: *React Native, Bittrex API, GitHub, & Adobe Photoshop*

2017-12 — **Manage Petro**
UI/UX
- As part of a team, redesigned the UI/UX for a fuel management system mobile application by making a prototype.
- Conducted interviews and surveys from the end users to improve the quality of the design.
- Created wireframes and color schemes that are appealing to the end user.
- Technologies Used: *MockingBot*

2018-04 — **Follow Thru**
Mobile and Web Application
- As part of a team, worked on an industry project which involves a web application communicating with a mobile application using a cloud database.
- This application helps therapists in tracking their client's progress on goals that were given to them.
- Co-developed majority of the mobile application both front and back end.
- Designed the interface for the entire mobile application.
- Managed our team repository and the application's database.
- Technologies Used: *React Native, NodeJS, HTML5, JavaScript, CSS, GitHub, & Adobe Photoshop*

Education

2016-09 - 2018-04 — **British Columbia Institute of Technology**
Diploma in Computer Information Technology
